SIM Settings Manual
～APN settings （Android devices）～

English

The procedure and menu indications differ depending on your model.

①Insert the SIM card into the phone body
*Please do this after the power is turned off.

Insert the SIM card

② Select　Settings ➡Mobile Network ➡Check APN
If not found, look for "mobile network" in the search 🔍)

②-1:If the APN settings are made automatically when the SIM is inserted

�‍Search Connections

Connections
Wi-Fi
Bluetooth
NFC/Osaifu-Keitai settings
Airplane mode
Mobile networks
Data usage

Mobile networks — Mobile data / Data roaming / Network mode 5G/4G/3G/GSM (auto connect) / Access Point Names / Network operators IIJ
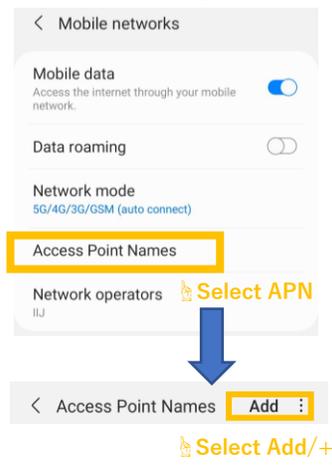

Access Point Names　Add ⋮
⊙ ppsim ppsim.jp

If the Network operators is IIJ and the APN is OK you can use the SIM card without any problem. 🖱

②-2:How to set APN information
restart your Phone : Settings ➡ connections➡Mobile Network➡Check APN
➡ Search mobile network from device settings

Check APN settings

Mobile networks
Mobile data — Access the internet through your mobile network.
Data roaming
Network mode 5G/4G/3G/GSM (auto connect)
Access Point Names
Network operators IIJ

🖍 Select APN

Access Point Names　Add ⋮

🖍 Select Add/＋

Edit access points

Edit access point
Name — Not set
APN — Not set
